

Are you dealing with Quaternary Ammonium Compounds?

If you have Biocidal products with ADBAC/BKC (CAS 68424-85-1) as active substance, deadline to submit your BPR dossiers is approaching fast (01/07/25 for PT2).

We have a solution that will save you time, cost and resources !

QuAC is an interest group created by CEHTRA that stands out from standard consortia and covers all Quaternary Ammonium Compounds (QUATs) and/or PT combinations.

Having been successfully applied to DDAC's BPR dossiers, we are eager to welcome new companies on board for other QuATs.

QuAC strategy is based on both: companies' main interests and our extensive experience dealing with BPR.

With QuAC, companies will have their own BPR dossiers but will still be able to benefit from the synergies of a group.

Unique approach

Optimised Strategy

Cost Reduction

Reduced Resources
